DETAILED ACTION

Status of Claims

1. Claims 8-13,17-20 are currently pending.

Response to Restriction requirement filed 01/16/2007 and 03/13/2007 is acknowledged. Applicant elected, with traverse, group III. Applicant argues that Group IV should be rejoined with Group III as they will not require a burdensome search. Examiner disagrees. The distinction between two products require one-way distinction and Examiner maintains that a reference teaching a product encompassed by Group IV will not necessarily teach a product of Group III. The restriction requirement is still deemed proper and is therefore made FINAL. Claims 11-13, as well as new claims 18,19, dependent on claim 11, are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected groups.

As per election of species requirement applicants have elected "nitrogen-containing heterocyclic group" as a hydrogen bond accepting group

Information Disclosure Statement

2. Applicants' Information Disclosure Statements filed 03/29/2006 and 03/31/2005 has been received and entered into the application. Accordingly, as reflected by the attached completed copies of forms PTO-1449, the cited references have been considered.

Claim Rejections - 35 USC § 102 and 103.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 8-10,17,20 are rejected under 35 U.S.C. 102(e) as clearly anticipated by Wu et al (US 2005107415 A1; priority date 05/17/2002).

The claims, to the extent of the elected species are directed to dextromethorphan having methyl group substituted by alkyl group bearing a nitrogen-containing heterocyclic group, such as an imidazolidine group. Dextromethorphan is a compound of formula

(Registry Number 125-73-5)

Wu et al teach derivatives of compound of formula I, wherein R can be heteroarylalkyl. In particular, heterocycle can be imidazolidine, piperidine, etc. See paragraph [0048]

4. Claims 8,9,17 are rejected under 35 U.S.C. 102(b) as clearly anticipated by Grussner et al (US 2970147).

Grussner teaches Morphinan derivatives, such as 2H-10,4a-Iminoethanophenanthren-6-ol, 1,3,4,9,10,10a-hexahydro-11-[2-(4-pyridyl)ethyl]- (Registry Number 820985-88-4) of the formula
